Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Application No. Applicant(s) 10/567,228 ZIEBART ET AL. Office Action Summary Examiner Art Unit Robert C. Watson -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS. WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status Responsive to communication(s) filed on 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 1-38 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) _____ is/are allowed. 6) Claim(s) _____ is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) 1-38 are subject to restriction and/or election requirement. Application Papers 9) The specification is objected to by the Examiner. 10) The drawing(s) filed on is/are; a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. Priority under 35 U.S.C. § 119 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

2) Notice of Draftsperson's Patient Drawing Review (PTO-948)

3) Information. Psed-sums Statement(s) (PTO/SECRE)

5) Notice of Informat Patient Application

6) Other:

Art Unit: 3723

In the following restriction requirement claims 1 and 27 are linking claims.

Additionally, claims 2 and 3 will be examined with any of groups I-IV and claims 28 and 29 will be examined with linking claim 27.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 4-6 and 31-34, drawn to a reel assembly having a reel handle perpendicular to the center axis.
- II. Claims 7-8 and 35-36, drawn to a reel assembly having a reel handle extending across the center opening in a curvilinear path.
- III. Claims 9-10, drawn to a reel assembly having a portion of the reel handle defining a convex surface.
- IV. Claims 11-12, 19 and 37, drawn to a reel assembly having the reel handle and housing formed as a monolithic structure.
- V. Claims 13 and 30, drawn to a reel assembly having a cassette handle mounted to the outer wall of the cassette to extend parallel to the center axis.
- VI. Claim 14, drawn to a reel assembly having a retaining ring sonically welded to the housing.
- VII. Claims 15-17, drawn to a reel assembly having a retaining ring having an inner wall fixed to the housing and an outer wall overlapping the outer wall of the cassette
- VIII. Claim 18, drawn to a reel assembly having a housing including a tangential passageway.

Art Unit: 3723

 Claim 20, drawn to a reel assembly having a fish tape that is a flat metal tape.

X. Claims 21-26 and 38, drawn to a reel assembly having a friction reducing member.

Claims 1 and 27 link(s) inventions I-X. The restriction requirement for the linked inventions is **subject to** the nonallowance of the linking claim(s), claims 1 and 27.

Upon the indication of allowability of the linking claim(s), the restriction requirement as to the linked inventions **shall** be withdrawn and any claim(s) depending from or otherwise requiring all the limitations of the allowable linking claim(s) will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104 **Claims that** require all the limitations of an allowable linking claim will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

Applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, the allowable linking claim, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Inventions I-X are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope

Art Unit: 3723

and are not obvious variants, and if it is shown that at least one subcombination is separately usable.

In the instant case, subcombination group I having a reel handle perpendicular to the center axis need not have the handle extend across the center opening in a curvilinear path as in group II and could instead have the reel handle on the outer perimeter of the housing and extend in a straight path and therefor has separate utility. Conversely, subcombination group II having the handle extend across the center opening in a curvilinear path need not have the reel handle perpendicular to the center axis as in group I and could instead have the handle bowed outwardly such that it is not perpendicular to the center axis and therefor has separate utility. Extending this same reasoning to all groups will show that all groups exhibit separate utility. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Application/Control Number: 10/567,228 Page 5

Art Unit: 3723

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- For example group I requires a text search in the winding classes (eg., class 242 and elsewhere) for perpendicular handles that is not required for the searches of the other groups. Group II requires a text search in the winding classes (eg., class 242 and elsewhere) for curvilinear handles extending across a center opening that is not required for the searches of the other groups. Using this same analysis it can be shown that all groups have unique searches. To perform all of these unique and different searches in one application would present a serious burden for the Office.
- (d) the prior art applicable to one invention would not likely be applicable to another invention:

Art Unit: 3723

(e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3723

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert C. Watson whose telephone number is 571 272-4498. The examiner can normally be reached on Mon. - Thurs., 5:30am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J. Hail III can be reached on 571 272-4485. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
